User Research & Product Design Lead Portfolio: bijnesh.netlify.app

PROFESSIONAL SUMMARY

UX lead with 10+ years turning user understanding into product decisions across AI SaaS, fintech, media and e-commerce. Plans and runs research end to end, from framing the question and choosing the method to synthesis and recommendations that product, engineering and leadership can act on. Uses usability testing, user interviews and product analytics to find where users struggle and why. Recent focus is AI products: how users trust, review and stay in control of AI output. A design background means insights reach teams in a form they can build from.

RESEARCH SKILLS

Research methods: Usability testing, user interviews, product analytics, UX audits and heuristic reviews, task and flow analysis, information architecture

Synthesis and strategy: Turning findings into prioritised recommendations, journey mapping, research planning, stakeholder readouts

AI product research: Human-in-the-loop UX, user trust and control in AI workflows, AI-assisted synthesis

Collaboration: Product, engineering, design and leadership teams

Tools: Figma, FigJam, Claude, ChatGPT, Replit, Lovable, Google Stitch, Adobe CC

EXPERIENCE

Principal Product UI Designer · BuzzBoard, Inc Mar 2020 – Oct 2026

Zylo5 (zylo5.com), an agentic AI marketing platform helping SMBs run social, ads, email, SEO and reviews with AI.

- Shaped approval, status and error flows around how small-business owners review and approve AI-generated work, so users stay in control of what the AI does.
- Ran UX and brand-compliance reviews across modules and onboarding, identifying friction points and prioritising fixes with product and engineering.
- Used usability testing and product analytics to find where users struggled with AI workflows and to guide design priorities.

UI/UX Designer, Assistant Manager · Karvy Next Limited 2017 – 2020

- Translated user behaviour and product requirements into flows and prototypes for fintech websites and mobile apps across multiple products, working closely with developers through delivery.

UI/Visual Design Consultant · The Economic Times 2017

- Designed microsites for The Economic Times and ET Money, plus web and mobile campaign experiences for large media audiences.

Lead UI Designer · TechnoXom Pvt. Ltd. 2016 – 2017

- Owned UX end to end, starting with user research, then task flows, wireframes, prototypes and final UI across web and mobile.

Earlier Experience

Web and graphic design roles at Fashion And You India and Great Web Solutions for brands including Indiabulls, Investors Clinic and Amrapali Group. Built the visual and front-end foundation behind later UX work.
